Senior Adventures in Learning and Travel (SALT), LLC

Welcome to the best lifelong learning program along the Grand Strand! Under the leadership of Kelli Barker and Carol Osborne, SALT will offer educational enrichment and social interaction to community members through online and in-person courses and clubs, and local, regional, national, and international excursions. See below for the complete lineup for our spring season, which begins **February 6** and ends **May 12**. After information and netiquette guidelines, you will find courses and clubs listed alphabetically by title within each subject category. Following this part of the catalog, which includes title, instructor, description, materials needed (if any) and material fees payable to instructor, schedule, and course fees, you will find the same courses (title and instructor only this time) organized by day and time in the At-a-Glance section. The next section lists the local excursions and the national and international tours that are now open for registration. Instructor bios can be found on the website. We hope that you will join us for what promises to be a fantastic array of enrichment opportunities. Spice up your life with SALT!

Registration Guidelines

In order to take classes at SALT, you must purchase a membership first. The membership fee for the spring season is \$25. Registration will open in early January through our website, wnsalt.com. Click on "Get Started" in the upper right-hand corner of your screen, select the membership, go to your cart and enter your payment information. Then you can click on "Courses" or "Excursions" and select the ones you want, add them to your cart, and once you have finished, click on the cart in the upper right-hand corner of your screen and check out.

Membership fees help pay our basic costs: insurance, licenses, web maintenance, etc. Plus, we know our members enjoy being part of a special community of lifelong learners. Classes vary in length from 1-3 hours and in duration from 1 to 14 weeks; therefore, members may register for upcoming classes at any point in the semester. However, we ask that you register at least one week before a course begins. Otherwise, the class may be cancelled due to under-enrollment since we "call" classes one week out. If we cancel a class, you will receive a refund. No refunds will be issued if you drop a class, whether this drop comes before or during the class. If there are extraordinary circumstances (such as a hospitalization or death in the family), you may appeal this rule. Decisions about refunds will be made on a case-by-case basis.

You are registered as soon as you receive your completed registration form. Be sure to mark your calendar for the first class meeting. You may join a class that has already begun for the full course fee, pending the instructor's approval. You will receive an email with a link to your class's Zoom meeting the day before the class is held. All you need to do beforehand is to download the free Zoom app to your device. Then you can click on the link and join the meeting five minutes before the class is scheduled to begin. **All instructors have been told to end their classes ten minutes before the hour so there will be no overlap in the meetings.**

SALT Catalog Spring 2023

Each individual attending an online class must be registered as a member of SALT and as a member of the class. **Even if you are using the same device as a friend or spouse, each of you is responsible for enrolling and making full payment before attending a session.** We appreciate your cooperation. Please recognize that we have no outside funding at this time, and every time you “cheat the system,” which isn’t hard under these circumstances, you are making it less likely that we can continue offering a lifelong learning program to the community.

Technology and Netiquette

Most classes will be delivered via Zoom this spring. If you need assistance downloading the Zoom app, please let us know. For our classes that are offered online, we are including a few guidelines to ensure that all members and instructors have a positive experience.

1. **Mute yourself** unless you are speaking. This will improve the sound quality for everyone in the class. Use only one device to log on, or you will create a feedback screech sure to annoy everyone.
2. Unless there is a pressing reason not to do so, turn your **camera on**. Socialization is so much easier when we can see one another’s faces. However, if you do not have a camera on your device or you are having a really bad hair day, you can still participate without being “present” visually.
3. Try to keep your device still during the class. When you have your camera on, others may find your movements distracting if you walk around your house, fidget with your controls, or interact with others in your home. You can always **turn the camera off** if you need to excuse yourself during class. Remember that everyone else can see what you are doing if it’s on—so please, no bathroom visits during class with the camera rolling! And be mindful of where your camera is pointed. We would rather see your face than other parts of your body!
4. Use the **chat feature** to communicate with the instructor and the rest of the class. You can direct your comments to the teacher or to everyone.
5. Log in to each class **on time**. Late arrivals are distracting for the instructor and the other students in your class.
6. As in all lifelong learning classes, **be polite** even if you disagree with the opinions of your classmates. We want our classes to be safe spaces where members can benefit from open and civil discourse. If you experience any impropriety within the program, from instructors or other members, report your concerns to wnsalt22@gmail.com as soon as possible. Also, be considerate of others and refrain from dominating discussion or talking over other students.

Courses and Clubs

In addition to our online courses, we also offer some in-person classes and clubs. The organizers of the dining and sports clubs will let participants know the location before each meeting. If the catalog says F2F (CF) or F2F (Carolina Forest), that location is the Bethea United Methodist Church, 350 W. Perry Road (behind Walgreens where Carolina Forest and 501 intersect). If the catalog indicates Myrtle Beach or Murrells Inlet, those classes will be at the instructor’s house, and the address will be given to participants before the class begins.

Arts, Crafts, and Photography

Beginning Watercolor Art, Kurt Jarvis

This four-week class is for beginners and will provide the very basic essentials of watercolor art. It will enable even those who think they have no talent to produce an art work of quality. This is NOT an art approach where everyone does the same art work. In this class each person will select an art work of their choosing from a variety of subject types and styles provided. Watercolor art is the most portable of art approaches and does not require extensive or bulky supplies. A complete watercolor kit including all necessary supplies will be provided at an additional cost of \$50.

For example, you will take a simple cardboard tube and create a useful and decorative item. Following classes will have you transforming plastic containers, old handkerchiefs, and other items into works of art. This class will give you a more creative view of the trash and old stuff we take for granted. The instructor will be supplying the "trash" items and most of the supplies. There will be no fee for any of this as she has plenty to share. She would like students to bring a few tools and will contact you with a suggested list.

Agrarian Folklore and Folk Remedies, Abby Geedy

Rural farming communities have long been places with people who lived and worked closely with the land for their daily survival. Folklore springs from this in ways such as knowing if the ‘signs’ are right for certain crops or other farm activities, a concept that drives much of the information in the widely used Farmer’s Almanac to this day. Agrarian communities were also often distant from doctors, or couldn’t afford to see one regularly. This encouraged folk remedies using mostly ingredients you could find on the average farm, as well as community faith healers. Join to learn more about agrarian folklore and folk remedies.

Women in Islam-Past & Present, Samih Baalbaki

The Quran (main source of Islamic law) has prescribed a special status for women. The Hadith (prophet Muhamad's sayings and actions) has reinforced that special status through teachings and specific practices. Over the years, traditions and various "scholarly" and cultural influences (not dissimilar to Western practices) have led to a diminished and somewhat "inferior" status of women in the Islamic world. This class will explain the basic Islamic principles, as well as the roles and responsibilities of women through 14 centuries of Islam with specific examples of women who made considerable contributions to the political, social, and educational public life. We will conclude with a look at the present situation in the Islamic world, also with specific examples of modern-day Muslim women.

Science, Math, Nature, and the Environment

A Fast Tour of Plane Geometry, Paul Moyer

This course will study about two dozen theorems from plane (Euclidean) geometry including similar triangles. Then similar triangles will be used as a bridge to a few basics about plane trigonometry. Little prior knowledge of mathematics will be needed and pictures will be included to elucidate each theorem. As with most mathematics the new material will build upon the old. Included in the course will be theorems about congruent triangles, parallel lines and similar triangles. There will be two complicated but important theorems, Ptolemy's and the so-called "Side-Splitter," but these theorems will be reviewed step-by-step. Similar triangles will be used to prove the (hopefully) familiar Pythagorean Theorem and the law of cosines. Although there is a lot of "modern" geometry which will not be the subject of this course, the intention is to introduce and/or review the first opportunity most students get to understand and use deductive reasoning and to show how mathematics develops tools to solve problems.

Tuesday, 1-2 p.m., 2/7-2/28, \$20, online (Zoom)

Flora & Fauna of the Carolina Bays, Abigail Geedy

Did you know that the Carolina Bays in Horry County are the only places in South Carolina you can find Venus Fly Traps growing wild? The Carolina Bays are elliptical depressions housing temporary wetlands surrounded by sandy rims. The origin of these dense and marshy depressions has been debated since being brought into the scientific spotlight thanks to aerial photography of the Myrtle Beach area in the 1930s. What isn't up for debate is the unique and familiar wildlife that call the Carolina Bays home, including multiple species of carnivorous plants. Join us to learn more!

Thursday, 2-3 p.m., 4/27, \$5, online (Zoom)

Permutations, Combinations, & Probability, Paul R. Moyer

This course will explore the mathematical nature of probability, primarily for so-called discrete sample spaces, i.e., where the number of possible outcomes of some thought experiment (e.g., coin tossing) is countable. The course will start with an explanation of the ways of enumerating possible outcomes of events, e.g. the number of ways a set of books can be arranged on a bookshelf or the number of ways a

committee can be chosen from a group of people. Then probability will be defined and the counting tools used to calculate probabilities in various situations. The last session will look at density functions (e.g the well-known bell-shaped curve) and distribution functions; these unfamiliar terms to be defined in the course are powerful tools to understand probability.

Pre-requisite: You will need some basic arithmetic skills (especially understanding of fractions), some basic understanding of graphs and willingness to learn some mathematical notations which simplify description of the concepts presented in the course.

Local Excursions

We can take a minimum of 10 passengers and a maximum of 13 on each trip. Because room in the van is limited, especially if we reach the maximum number of passengers, participants are only allowed to bring one small backpack or purse on each trip. If you need to travel with additional items (e.g., walkers or wheelchairs), we ask that you drive separately (provided that there is room at the venue). If the cap of 13 van passengers is reached and you would like to drive and meet us at the destination, we will also add you to the roster (provided there is room at the venue). Email us at customerservice@wnsalt.com if you wish to drive separately.

Please pay close attention to the activity level for each excursion:

Level 1: Easy—minimal level of physical activity, minimal walking and limited stairs or standing.

Level 2: Moderate—some walking and standing.

Level 3: Active—walking a mile or less, climbing stairs, standing for periods.

Level 4: Moderately Challenging—difficult or extensive walking, sometimes over uneven terrain, stairs, and/or standing for extended periods.

Level 5: Challenging—demanding programs for seasoned outdoor enthusiasts and/or extremely active adults.

We ask that all participants show proof that they are fully vaccinated for Covid-19 before traveling with us. Bring a mask in case the venues we visit require one. Liability waivers should be printed out and signed and presented to Kelli or Carol at the start of the trip. (We will have copies with us if you do not have access to a printer.)

You will receive a full itinerary with departure times and locations (and **estimated** return times) at least two days before the date of the excursion. We depart from the Kohl's parking lot (corner of 544 and Bypass 17) for all trips. If we are going south, we will also stop at Litchfield Landing. If we are going west, we will also stop at University Commons (corner of 501 and University Blvd.). If we are going north, we will also stop at the Lowe's Foods on International Drive.

No refunds will be given unless we are able to fill the seat.
